### WORK EXPERIENCE

#### **Software Engineer**

Sabi | June 2021 - Present

Sabi is Africa's fastest growing B2B network for informal trade.

- Developed an Out of stock feature that notifies users when a product they selected is back in stock.
- Worked with the Product Managers to re-architect the codebase
- Tested Software for bugs and operating speed, fixing bugs and documenting them.
- Worked with developers to implement and consume RESTful APIs that feed data to the frontend.
- Created reusable components that saved hours of development.
- Tested and updated existing software with my expertise.
- Redesigned the company's admin website
- Integrated Algolia into the web application.
- Participated in daily scrum meetings, sprint planning, unit testing and bug fixes
- Working Closely with the QA and Product Management teams as well as other developers to ensure quality and punctual software development.
- Developed an App Survey system that takes feedback from app users and sends the response to the backend.
- Developed a merchant customers module that allows users to view, add and edit their list of customers.
- Developed a Merchant Verification Module that verifies the identity of a user on the app by receiving required details and documents.

- Redesigned existing modules and enabled integration and styling of third party packages like toastify, react-modern-calendar-datepicker etc.
- Participated in coding reviews with product team and gained feedback from senior engineers on writing custom, scalable code.
